Data Protection Branch (DPB)

- Sli.do
- Privacy & Data Protection Act (2014)
- Video – Data Protection and You
- VPDSF & VPDSS
- What information is covered?
- Who is involved?
- Why do we need to do this?
- Where to start?
- Third party engagement
- What does this mean for partner organisations?
- When do VPS organisations have to report?
- Tool to support you
- Help build your ideal Partners VISN

## Sli.do

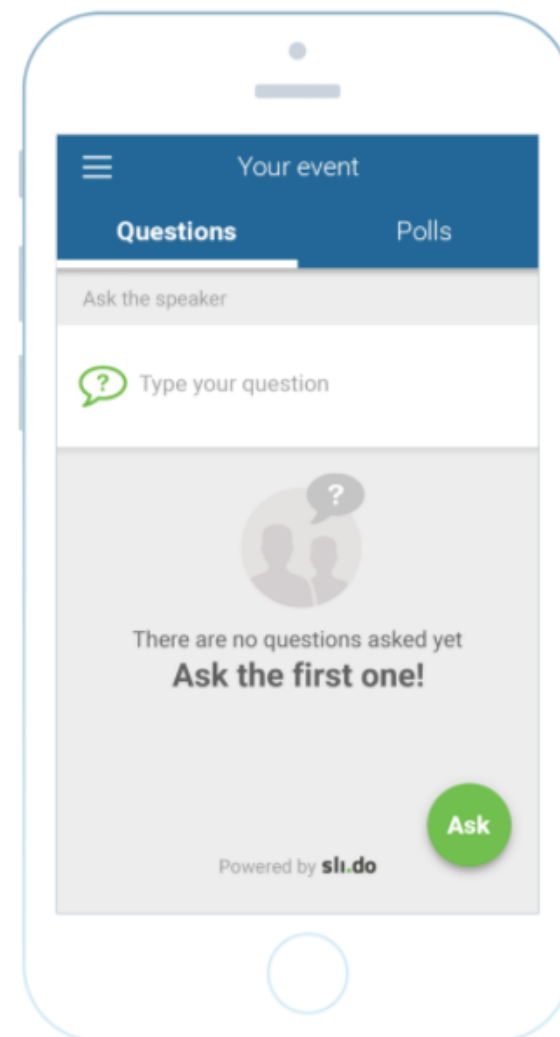

During the event we will be using an online tool (Sli.do) offering you an opportunity to interact with our presentation, engage in polls and ask questions.

For those using the tool you will have the option of posting anonymously and can also download the presentation and a summary infographic onto your local device.

The team will moderate the tool and will post any relevant comments or material to the audience...

# Privacy & Data Protection Act (2014)

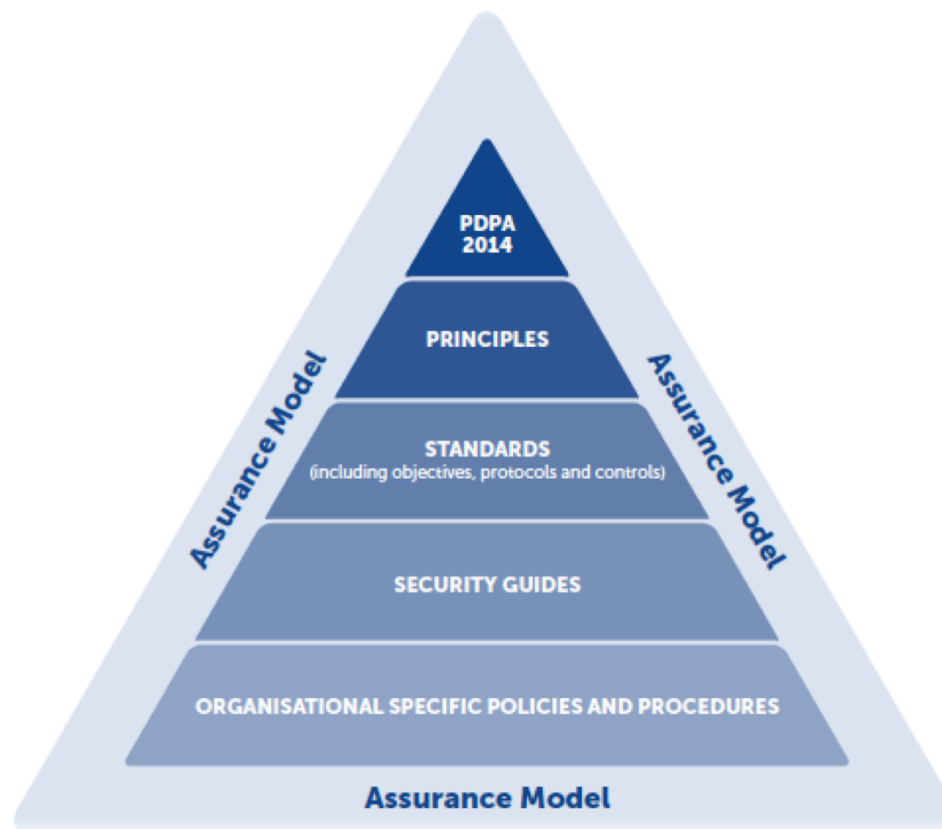

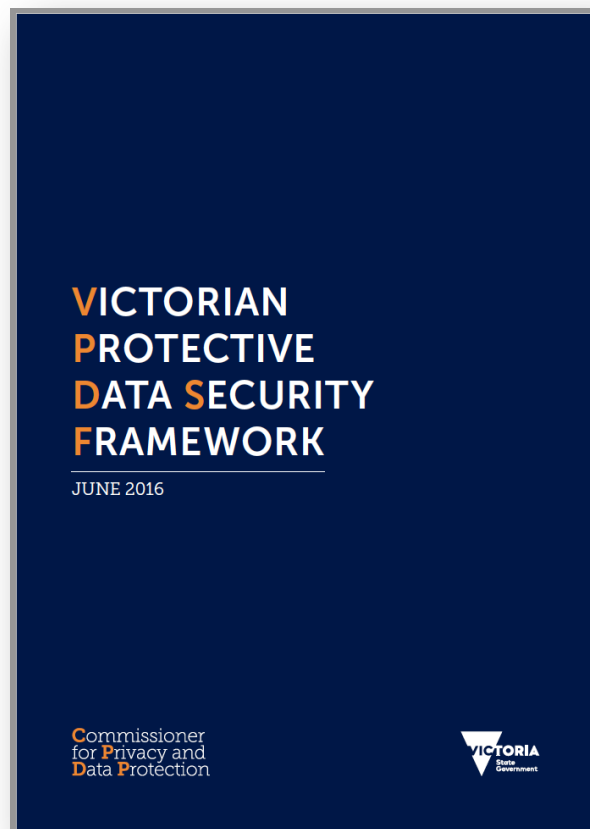

# 'Data Protection and You'

Awareness video of the Victorian Protective Data Security Framework

# The Framework

# The Standards

The Victorian Protective Data Security Standards (VPDSS) were formally issued on 28<sup>th</sup> of July, 2016.

# What is covered?

Any information obtained, received or held by an agency or body to which Part 4 of the Privacy and Data Protection Act (2014) applies.

This includes both hard and soft copy information, regardless of media or format!

# Who's involved?

## CPDP -

Office of the Commissioner for Privacy and Data Protection

## Directly in scope -

Applicable agencies or bodies set out under Part 4 of Privacy and Data Protection Act (PDPA) 2014

Public sector body Head

## Indirect obligations -

Organisations with access to Victorian public sector data, have indirect protective data security obligations

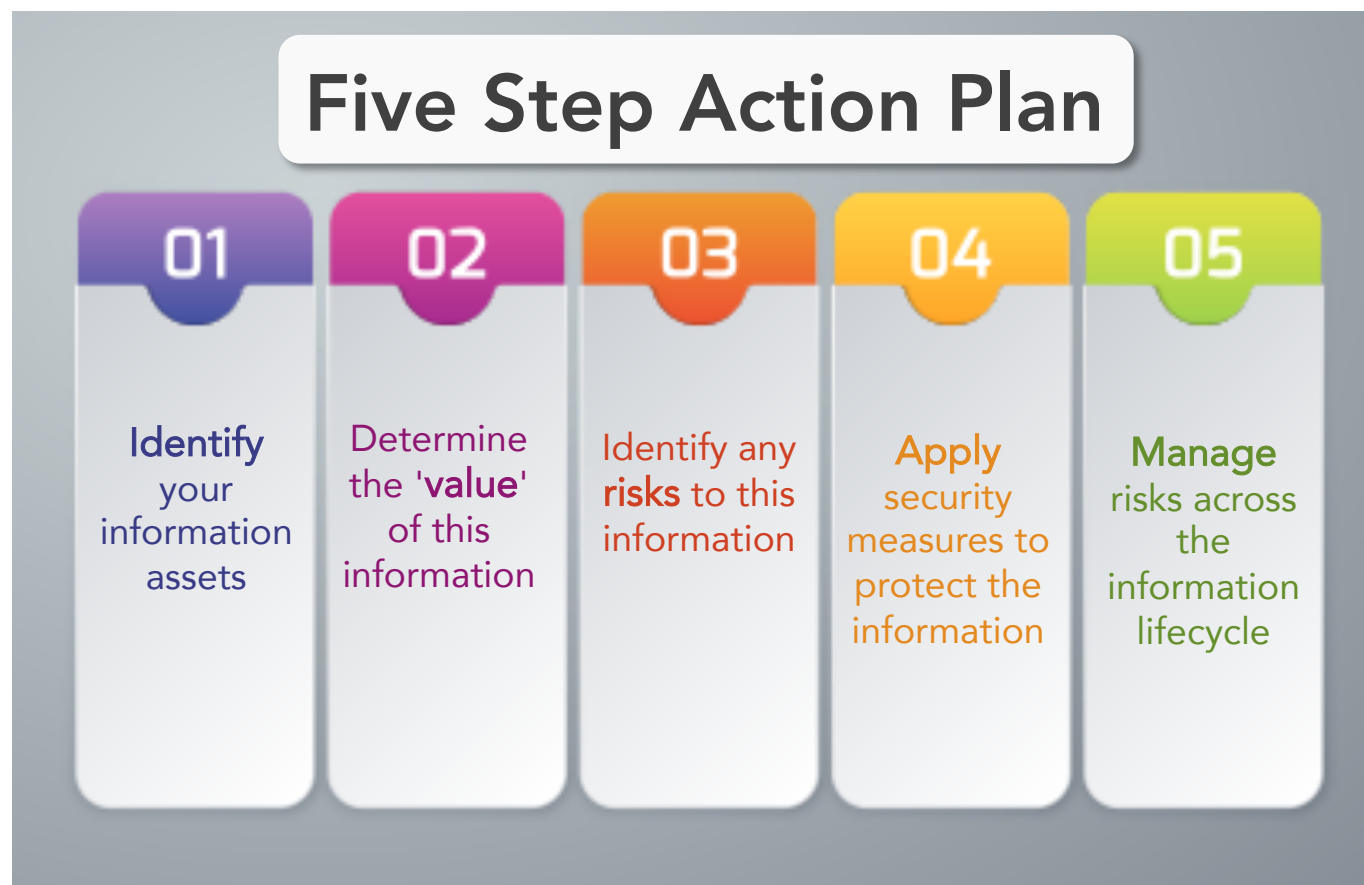

# Indirect security obligations

# Why do we need to do this?

## Where to start?

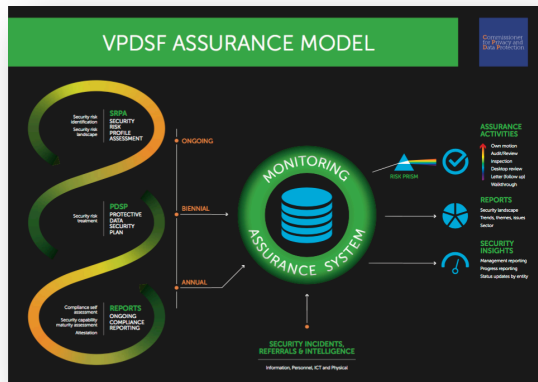

# Third party engagement

Applicable VPS organisations must ensure that any contractual arrangements or information sharing agreements (including Memorandum of Understandings) have the relevant protective data security requirements embedded into the terms or conditions of the agreement.

## What does this mean for partner organisations?

- Under the VPDSS partner organisations do not need to provide CPDP a -
  - Security Risk Profile Assessment (SRPA), or
  - Protective Data Security Plan (PDSP)
- Given this, Standards 11 & 12 do not strictly apply to partner organisations

Instead, VPS agencies who are in scope for the VPDSF will require partner organisations provide a level of assurance on their protective data security practices.

Responses from partner organisations will inform the SRPA and PDSP of the VPS agency.

How VPS agencies will seek this assurance from their partners will differ, depending on the value of the information and the type of engagement or arrangement.

# VPS reporting obligations

# Tools to support you

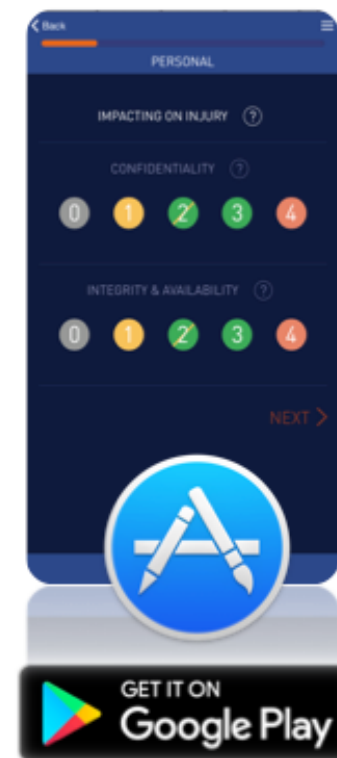

## CPDP Mobile App

Currently available for download on table devices (iPad and Android)

*Simply search for 'CPDP' in the app store to download your own copy*

## 'BIL' Mobile App

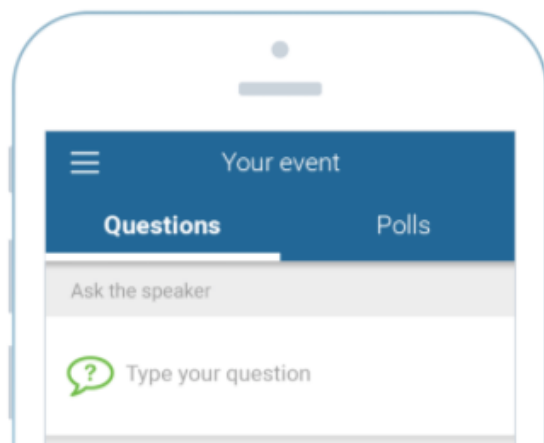

# Question & Answer session

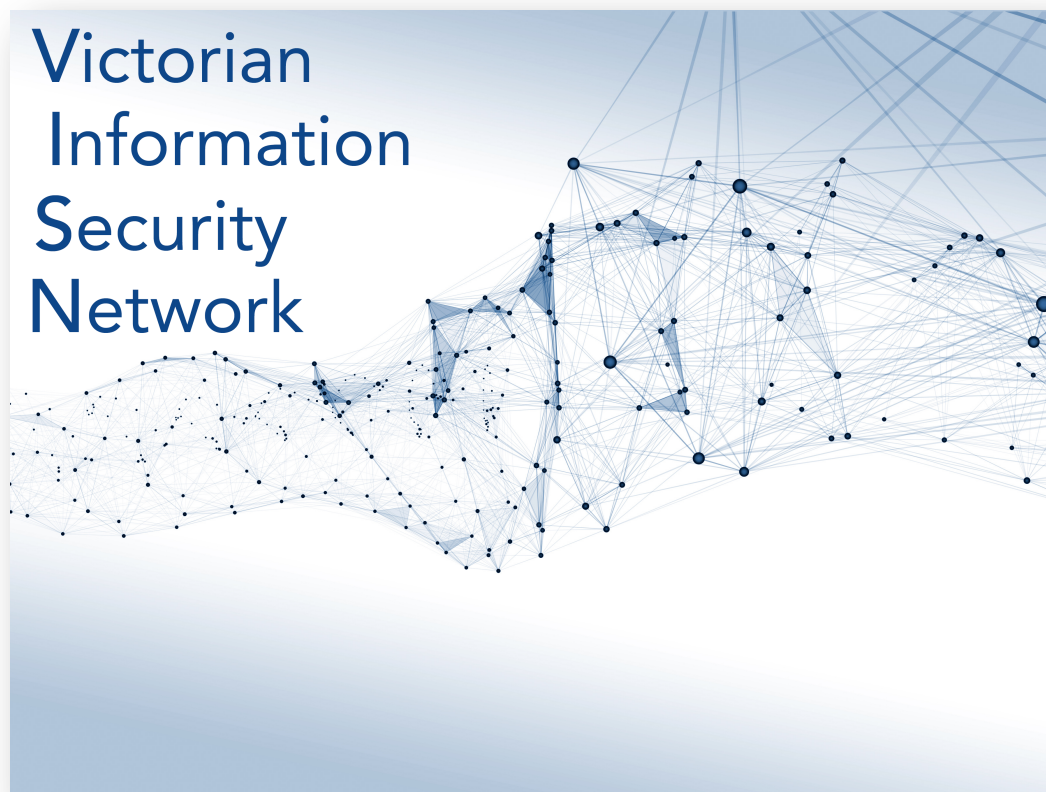

## Questions?

Opportunity for you to ask questions through **Sli.do** or to take questions from the floor...

For any other feedback or enquiries please direct your comments to the the [security@cpdp.vic.gov.au](mailto:security@cpdp.vic.gov.au) mailbox

# Help build your ideal Partners VISN

# Help build your ideal Partners VISN

Help us:

- Determine the membership of the Partner network
- Understand what you want from the Partner VISN
- Understand how you want the Partner VISN to operate both now and in the future
- Input into, and help develop, the VISN Charter & Terms of Reference (TOR)
- Help frame important messages to encourage participation and collaboration across your business ,between partner groups and with the VPS. This includes those who haven't traditionally been engaged in protective data security activities and programs
